RESEARCH EXPERIENCE

IQVIA, Analytics Center of Excellence, Boston

Machine Learning Research Intern

May. 2020–Aug. 2020

- Gaussian Process for health risk prediction: Designed Bayesian machine learning models for informative health risk prediction. Different from previous methods, our proposed model is able to give uncertainty-based rich prediction. Moreover, we leveraged multi-sourced data with different modalities.
- Supervised by Cao (Danica) Xiao (IQVIA), Prof. Fenglong Ma (PSU) and Prof. Jimeng Sun (UIUC).

CityBrain Lab, Hangzhou

Machine Learning Research Intern

Jul. 2018–Aug. 2019

- Reinforcement learning for traffic signal control: Designed and implemented a reinforcement learning (RL) approach with justification on state and reward design for multi-intersection traffic signal control
- Supervised by Prof Zhenhui (Jessie) Li (PSU).

SJTU PAMI Lab, Shanghai

Research Assistant

Sep. 2017–Mar. 2018

- Implementation of SVM with indefinite and semi-definite kernels: Coauthored a software package which accommodates Support Vector Machine (SVM) classification algorithms with indefinite kernels and semi-definite kernels. Moreover, we incorporated Sequential Minimal Optimization (SMO) in the traditional SVM algorithm and Provided various kernel functions, including TAHN, TL1, gaussian, polynomial and linear kernels
- Supervised by Prof Xiaolin Huang (SJTU).
